JMRemoveLinkBox

Removes the blue border around links and image maps in IE on Mac, and the dotted border in IE on PC, Mozilla/Firefox and Netscape.

Install GoLive Actions

Unpack the zip file and install the GoLive action by moving or copy the files into your JMActions folder in the GoLive actions directory.

GoLive Application Folder > Modules > JScripts > Actions > JMActions

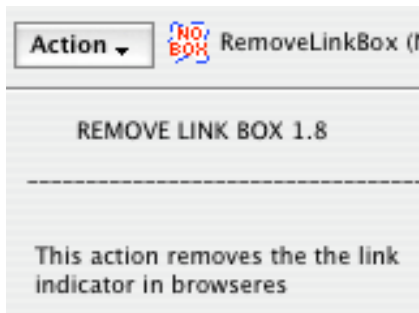

It's always a good idea to put all your third party actions in a separate folder. If you don't have a "JMAction" folder in the Actions directory, just add a new folder in the Actions folder and name it.

Restart GoLive so the actions are activated. And you are ready to go!

How To Use RemoveLinkBox

Place the action in the head of the document.

Attention

This action disable navigation using tabulator, and shud therfor only bee used with care.

Problems

Action is greyd out.

Are you having problems with the action not being visible or is greyed out? The fix is very simple.

1. Open the action file in GoLive, just like any other file.
 2. Save the file using "save as" with the original name.
 3. Restart GoLive and the action should now be available.
- (Doing this will cause the icon to disapar but the action shud now work)

GoLive CS2.

GoLive CS2 users may have some problem with using 3part actions do to a minor bug in CS2.

The promlem is that CS2 wont use the action (put it in the scriptLib). normaly this problem is solved by flatten the scribtLibery when adding the action (normaly this only has to bee don first time using the action).

Another solution if flatning the scriptlibery dont work is to open the action file in GoLive, just like any other file. make a smal change, an change back agin and the save it. Or do as if the action is grayd out (see above)

If you cant get my actions to work pleas feel free to contact me.
