Instalation

**Hot to use the extension**

Problems

Legal Information

JMCHmodCalculator

The JM CHmod Calculator GoLive extension will give you a simple calculator to help you with FTP Access premisions for files. Calculate the chmod numbers by setting the premissions or vica versa.

Install GoLive Extensions

Unpack the zip file and install the GoLive extension by moving or copy the extension folder into your Extend Scripts folder in the GoLive Modules directory.
GoLive Application Folder > Modules > Extend Scripts >
Restart GoLive so the actions are activated. And you are ready to go!!

How To Use The CHmod Calculator

Calculate the chmod numbers by checking the permissions boxes and read the number to the left
or write a permissions number and the permissions boxes wil show what permissions the nubers gives.

Problems

If you cant get the extension to work pleas feel free to contact me.

?
