Hot to use the action

Problems

Legal Information

JMCenterLayer

The JM Slide Open Window GoLive Action will allow you to center a layer <div> both horizontally and vertically. You can scale and style the layer normally as you want it to be, in the CSS inspector. The centered layer will always be position relative, even if set to others in the CSS.

Install GoLive Actions

Unpack the zip file and install the GoLive action by moving or copy the files (.action and .js) into your JMActions folder in the GoLive actions directory.

GoLive Application Folder > Modules > JScripts > Actions > JMActions

It's always a good idea to put all your third party actions in a separate folder. If you don't have a "JMAction" folder in the Actions directory, just add a new folder in the Actions folder and name it.

Restart GoLive so the actions are activated. And you are ready to go!

How To Use Center Layer

Make a layer (<div>) on a page, and give it an unice ID name. Place the CenterLayer action in the pages head and set the parameters in the action window.

Style and scale it as you want in the CSS inspector.

Parameters

Name of Layer - Select the layer (<div>) name from the list, you want to center.

IE5.1mac

IE5.1mac will normally on resize, use the old size of the layer/window, and will first take the new size, the next time you resize the window. So take care of the bug IE5.1mac will instead of resizing, reload the page. (from the browser cache).

Problems

Action is greyd out.

Are you having problems with the action not being visible or is greyed out? The fix is very simple.

1. Open the action file in GoLive, just like any other file.
2. Save the file using "save as" with the original name.
3. Restart GoLive and the action should now be available.
(Doing this will cause the icon to disaper but the action shud now work)

Action wont work.

The problem can be Golive wont recognize/use the action (put it in the scriptLib or write it in the page). normaly this problem is solved by flatten the scribtLibery when adding the action to a page (normaly this only has to bee don first time using the action).

Another solution if flatning the scriptlibery dont work is to open the action file in GoLive, just like any other file. make a smal change, an change back agin and the save it. Or do as if the action is grayd out (see above)

If you cant get my actions to work pleas feel free to contact me.

Legal Information

Unless other is mention, the material is made and owned by me (Jesper G.O. Møller)

You may not remove my name from any of my materials.

J.G.O.M. can not be hold responsible for the use of anny action.

For material not made by me, pleas contact the owner.

FreeWear

All my GoLive actions are totaly free for private, non commercial use, and you may use them as you like, as long as you don't sell them or use them for any criminal purpose.

If you like my work, and want to credit me for my work please link to my pages.

CareWear - Commercial use

If you want to use my GoLive actions for comercial sites/use, please make a donation you find fit, to a charity of your choice. And mail me a copy of the transfer.

That is what I call CareWear.

Best regards

Jesper G.O. Møller www.jart.dk/jgom/
